

Four in a Row

Roll · Find · Mark

An actual board from the game

One die · Two pencils · No cutting

How to play

Two players. Choose boards A and B from the same pair. Print single-sided, one board per sheet, at 100% / Actual Size. Turn off Fit to Page. You need one die and two pencils.

Pair 1: pp. 3–4 · Pair 2: pp. 5–6 · Pair 3: pp. 7–8

The die-and-picture key is at the top of each board.

1. Roll the die once. This roll is for both of you.
2. Find that number at the top of the page. The picture below it tells you what to find. For example, a 2 means a candle.
3. Each of you chooses a matching picture with no X on your own board and puts one X in its circle. If several match, choose any one.
4. If all the matching pictures already have an X, skip marking this time. Do not take an extra roll.
5. Wait for each other. Then check both boards. Four Xs in neighbouring cells in one straight line win. The line can go across, down or diagonally.
6. If you both make a line after the same roll, you both win. When someone wins, the game is over. If nobody has won, roll again. Keep all your Xs.

For the next game, erase the Xs and swap boards.

Christmas Gift Roll · Four in a Row

Pair 1 · Board A

book

candle

socks

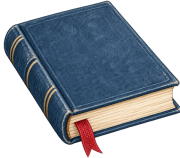

mug

teapot

sweater

Roll → find the picture → mark one X. Make four in a row.

Full rules are on page 2
